*Principal Investigator (Multiple PI: Guilamo-Ramos and Muñoz-Laboy)*  
Network Determinants of Risk among Formerly Incarcerated Latino Men  
National Institute of Mental Health  
Grant No. 1RC1MH088636-01 – Challenge Grant in Health and Sciences Research  
Duration of study: 2009 – 2011      Total cost: \$1,000,000

The primary aim of the research study is to examine the familial and social network factors of drug use and sexual risk behavior among formerly incarcerated Latino men (FILM) in order to develop a network-based intervention to reduce HIV and sexually transmitted infections.

*Principal Investigator*  
Family and Cultural Influences on Sex among Latino Youth  
Centers for Disease Control and Prevention  
Grant No. DP000175-01  
Duration of study: 2005 – 2010      Total cost: \$1,506,333

The primary aim of the present research is to examine factors associated with sexual risk taking in Latino youth. The project seeks to examine social, familial, and cultural forces that impact adolescent sexual decision making among a sample of Mexican, Puerto Rican, and Dominican youth.

*Principal Investigator (Multiple PI: Guilamo-Ramos and Padilla)*  
High-Use Alcohol Venues: Tourism, Sex Work and HIV in the Dominican Republic.  
National Institutes on Alcohol Abuse and Alcoholism  
Grant No. 1R21AA018078-01  
Duration of study: 2008 – 2010      Total cost: \$430,000

The primary aim is to examine factors associated with tourism, alcohol use and HIV-related sexual behaviors in Sosúa, a major international tourist destination in the Dominican Republic affected by high rates of alcohol and drug use, transactional sex and population mixing between native Dominicans and tourists.

*Principal Investigator*

Reducing Teen Sexual Behavior: A Clinic-Based Approach

National Institute of Mental Health

Grant No. 1 R34 MH078719-01A1

Duration of study: 2007 – 2010

Total cost: \$652,050

The primary aim of this project is to develop a clinic-based intervention to reduce sexual risk taking among Latino and African American adolescents. The intervention takes place in a primary healthcare clinic and is coordinated through social workers when physicians see adolescents for their annual physical examinations. The research will lead to a large-scale clinical trial in the form of an R01 submitted to the National Institutes of Health.

*Principal Investigator*

Reducing Adolescent HIV-Infection in Maharashtra, India: A Family-Based Approach

National Institute of Mental Health and the Indian Council of Medical Research: Administrative Supplements for U.S.-India Bilateral Collaborative Research on the Prevention of HIV/AIDS

Parent Grant No. 1 R34 MH078719-01A1

Duration of study: 2008 – 2009

Total cost: \$76,200

The project is a collaborative relationship between faculty at the Schools of Social Work at the Tata Institute of Social Sciences in Mumbai, India and at Columbia University in New York, NY. The Investigative Team consists of Dr. Vincent Guilamo-Ramos, Principal Investigator; Dr. Asha Banu Soletti, Co-Principal Investigator; Dr. Vimla Nadkarni, Co-Investigator; and Dr. Denise Burnette, Co-Investigator. The project will conduct formative research with families in rural communities of Maharashtra, India related to the design and development of a family-based HIV prevention intervention to reduce vulnerability to HIV-infection among rural Indian youth aged 14 – 18 years old.

*Principal Investigator*

Reducing Adolescent Sexual Risk Behavior and Vulnerability to HIV-Infection in the Dominican Republic: A Parent-Based Approach

Columbia University: Diversity Initiative Research Fellowship, Diversity Funds in the Professional Schools; Center for the Study of Ethnicity and Race; Institute for Latin American Studies.

Duration of study: 2007 – 2009

Total cost: \$30,450

The project is an extension of the PI's research on parental influences on adolescent sexual risk behavior with Dominican families in New York, NY. The immediate aim of the project is to conduct formative qualitative and quantitative studies with mothers and adolescents residing in the Dominican Republic. The data will be utilized to secure National Institutes of Health funding to develop a parent-based intervention to prevent sexual risk behavior among Dominican youth ages 11-15.

*Mentoring Faculty*

Minority Researcher Skills in Youth, Community, Family and HIV

Principal Investigator: Beatrice Krauss, Ph.D.

Hunter College, Center for Community and Urban Health

Grant: 1R25MH083602-01A1

Duration of project: 2009 – 2012

The overall purpose is to increase the number of HIV/AIDS researchers who are from communities that are disproportionately affected by HIV. The grant supports a Fellowship Program for early career academic faculty and advanced degree health/social service professionals that is designed to advance the research careers of accepted fellows to become federally-funded researchers in youth, community, family and HIV.

**COMPLETED RESEARCH AND RELATED ACTIVITIES**

*Principal Investigator*

Building Quality Parent Components for School Based Health Programs

Centers for Disease Control and Prevention – Division of Adolescent and School Health

Grant No. U87/CCU220155

Duration of study: 2001 – 2007

Total cost: \$4,270,871

The goal of this project is to develop and evaluate a parent based intervention that can be used with existing school based programs designed to prevent or reduce sexual risk behavior or prevent or reduce tobacco use in young adolescents. The project focuses on a middle school aged sample of African American and Latino youth.

*Principal Investigator*
